

STATISTICA VERSION 8 SINGLE USER Installation Instructions

Users running Windows 2000, XP, or Vista on their client machines must log in with Administrator permissions to complete the client installation. The installation makes necessary changes to the system. If the user is prompted to reboot during the installation, he/she must log in with Administrator permissions after rebooting to successfully complete the installation. All workstations must have Microsoft Internet Explorer version 5.5 or higher installed.

If you have a previous version of *STATISTICA* already on your computer, please use Control Panel - Add/Remove Programs to remove the old program.
